

RSD Series Fiber Enclosures

CABLEExpress®

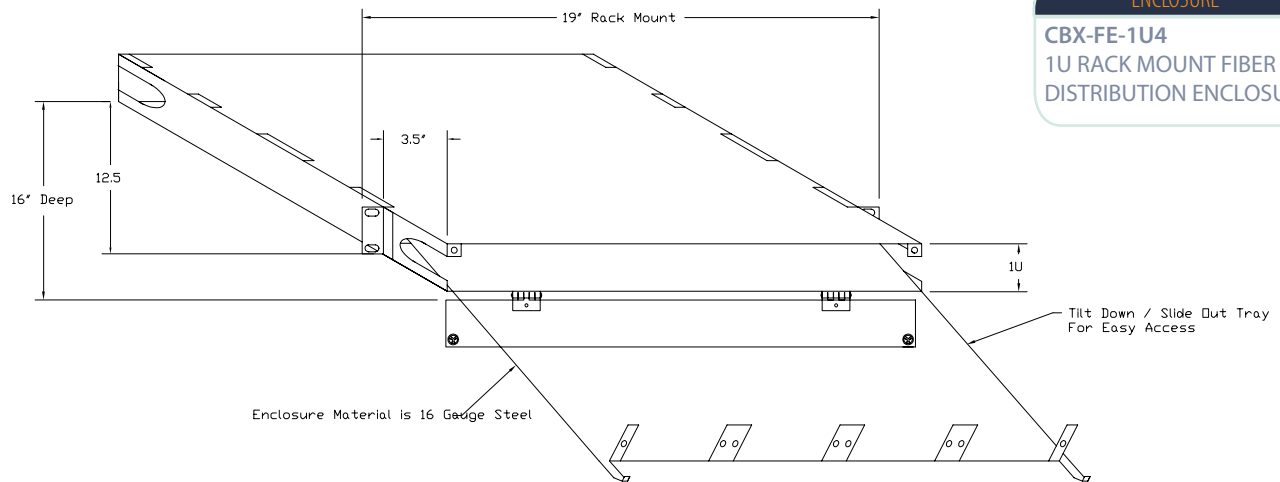

Our CABLEExpress® 1U, 2U and 4U Enclosure solutions provide high density, low DB loss connections. They support up to 96 fibers in 1 rack unit and 384 fibers in 4U, saving valuable space. Their modular design allows for multiple connector types within each enclosure, and new LC and SC couplers utilize state-of-the-art stable springs for minimal coupler movement. Plus, they come standard with a lifetime warranty.

Check out these standard features:

- Low loss components allow flexibility in fiber network design.
- Slide-out, tilt-down drawer provides easy access.
- Internal cable managers maintain proper bend radius.
- Rugged design allows fiber to remain secure.
- Easy access to front, rear and top of enclosure.
- Designed to accept 4, 8 or 16 adapter panels and/or modules.
- Plexiglass front for added protection.
