

CABLExpress EXP Series®

The structured cabling solution that fits your budget

CABLExpress®

A DIVISION OF CXTEC

A quality, well-designed structured cabling solution shouldn't have to break your budget.

What if you could get a reliable, standards-based structured cabling system that is affordable and easy to install?

CABLExpress has your solution – our EXP Series.

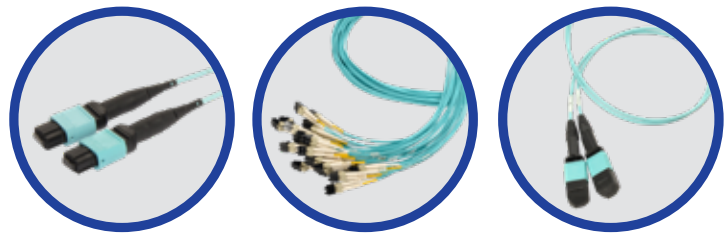

Features and Benefits

- System features fiber trunks, fiber patch cables, and modules designed to help you meet or exceed industry cabling standards for dB loss
- All EXP Series modules are compatible with the CABLExpress Easy Access (EA), and RSD Series patch panels
- Save time on installation, maintenance, and even future upgrades in your data center
- Save money by paying less to manage and cool your data center, decreasing total overall cost of ownership
- Save space by reducing cable congestion and making room for additional equipment

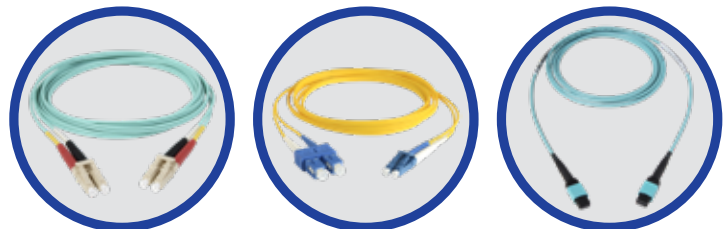

EXP Series Trunk Options

- Plenum jacket (OFNP)
- MPO and/or LC connectors
- Singlemode and Multimode available

EXP Series Patch Cables

- Jumper options include:
 - MPO
 - LC
 - SC

EXP Series Patch Panels

All EXP Series modules are compatible with the CABLExpress Easy Access (EA), and RSD Series patch panels

- Multimode OM4, 12 port duplex
- Singlemode OS2, 12 port duplex
- MPO adapter "feed thru" options available

Technical Specifications

CABLExpress EXP Series products meet or exceed each of these specifications:

- TIA-942 Revision B, Telecommunications Infrastructure Standards for Data Centers
- TIA-568 Revision D, Commercial Building Telecommunications Cabling Standard Set
