

# ▶ Tap Modules

**CABLEExpress®**

CABLEExpress® Tap modules allow for passive optical tapping of network traffic within the space-saving footprint of our enclosures. The modules fit in our 1U, 2U and 4U RSD Series Enclosures and 1U, 6U, and 10U H-Series Enclosures. This can allow for a design that significantly reduces rack space usage compared to other methods of optical tapping. This allows for tapping to be seamlessly integrated into a structured cabling system.

## FEATURES

- Integrate seamlessly into your existing structured cabling system
- Reduce rack space usage
- Premium components for ultra-low loss
- Rugged design allows fiber to remain secure
- Available in multi-mode OM3/OM4 and single-mode options with either a 50/50 or 70/30 split
- Able to fit H-Series 1U, 6U and 10U and RSD Series 1U, 2U and 4U footprints
- Meet recommended TIA-942 structured cabling design standards
- Backed by a lifetime warranty
