

CABLEExpress<sup>®</sup> H+ enclosures provide maximum scalability, allowing you to customize your layer one cabling infrastructure to your unique business needs. Each sliding tray houses four modules, and each module contains six LC duplex ports. H+ enclosures provide optimal usability and manageability to allow for a seamless transition as you continue to migrate to higher speeds.

Featuring the highest port density for fiber optic cabling currently offered in the marketplace, H+ enclosures accommodate up to 288 duplex LC ports in a 4U, 144 in a 2U and 72 in a 1U configuration. Plus, they come standard with a lifetime warranty.

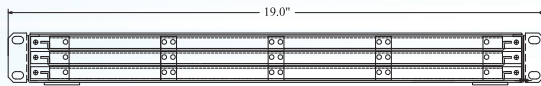

## FEATURES

- Each sliding tray has four modules, each module has six LC duplex ports
- Front door provides protection for your cabling
- Cable management trough and side tie-down areas that allow for uniform cable routing
- Angled rear cable management brackets maintain proper bend radius and protect connectors
- Backed by a lifetime warranty
