

Skinner-Trunk[®] Harness

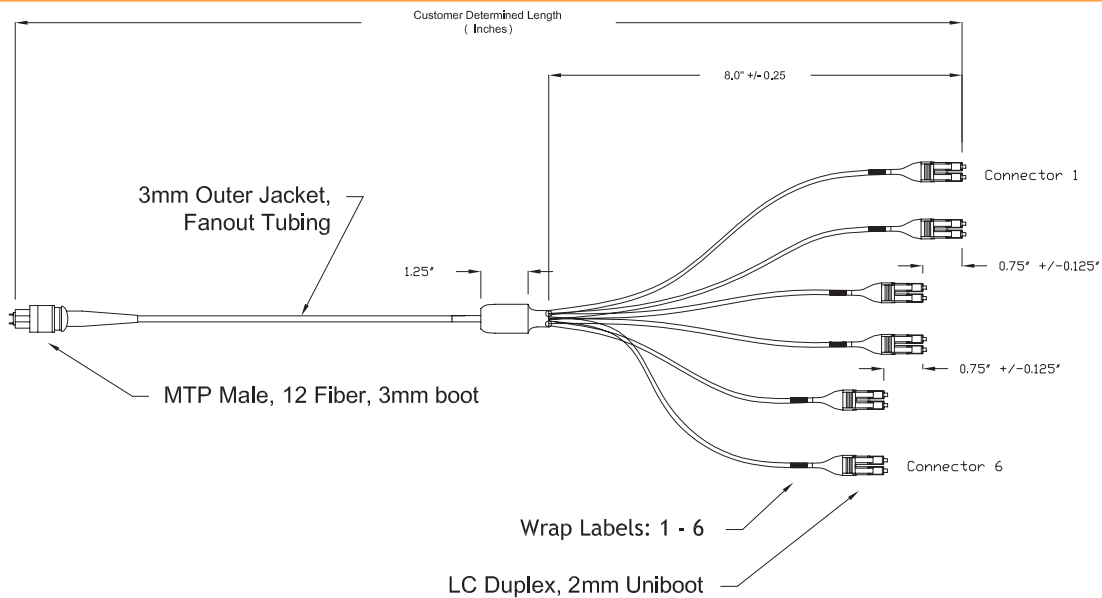

CABLEExpress[®]

The CABLEExpress[®] Skinny-Trunk[®] harness is the ideal condensed solution to reduce cabling congestion in your data center cabinets. It offers optimum cable management with pre-engineered staggering to the exact specifications of high-density switch ports. The round, 2mm fiber cordage on its LC legs allows for maximum routing flexibility while maintaining ultra low dB loss that far exceeds industry dB loss performance standards. Its 6-to-1 plug in factor with the MTP[®] connector saves valuable installation time. Plus, it comes standard with a lifetime warranty.

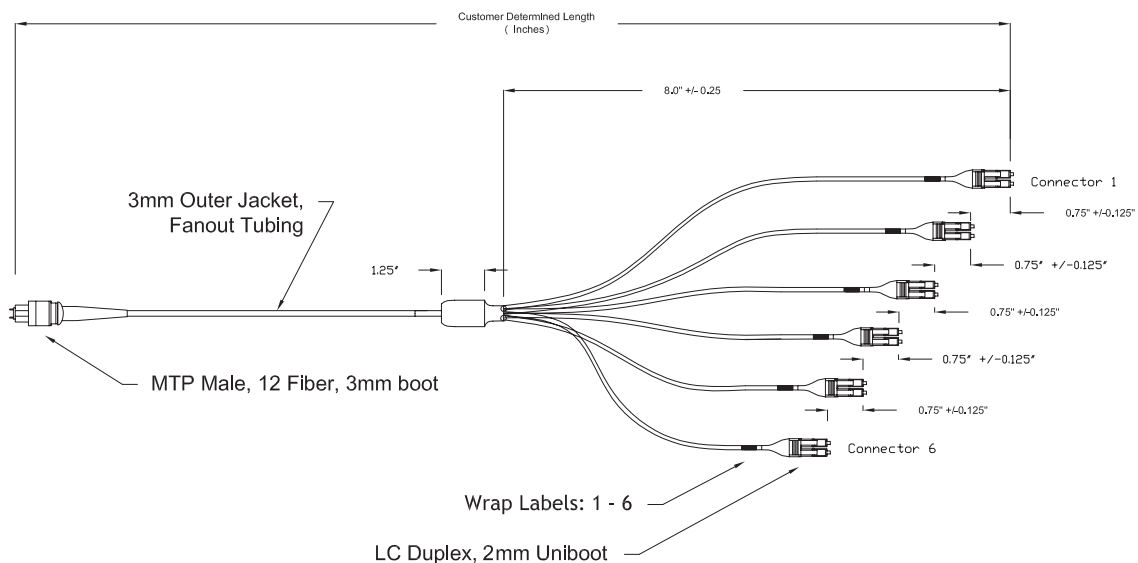

Features

- Pre-engineered staggering for optimum cable management
- Round fiber cordage on LC legs allows for maximum routing flexibility
- 3mm 12 fiber Skinny-Trunk saves space, reduces congestion
- Far exceeds industry dB loss performance standards
- Smallest form factor furcation point
- 6-to-1 plug in factor saves valuable time
- Fully compatible with H-Series enclosures and Z-Mount

Typical 48 Port Application

Typical 24 Port Application
