

The CABLEExpress® Z-Mount™ with MTP® is a universal mounting bracket that fits any standard rack spacing. No specific cabinet or rack is needed to fit the Z-Mount bracket. Its molded MTP® couplers offer maximum routing flexibility and are engineered for precision mating that far exceeds industry dB loss performance standards. Whether your trunks come from under floor or overhead, its couplers are field-reversible to further assist with cable management. It's available in six versions: 4-port, 8-port and 12-port with MTP® couplers on either the left or right. Plus, it comes with a lifetime warranty.

Z-Mount Installation
